Describe what you have done to achieve the desired checkoff requirement for this lab:

- Added a new Panel object under Canvas
 - Panel is hidden via script in Start() method
- Panel contains two new TextMeshPro (FinalScoreText & GameOverMsg) and one new Button (GameOverRestartButton)
 - GameOverMsg – Displays string “Game Over”
 - FinalScoreText – Displays final score of the player using the text of ScoreText
 - GameOverRestartButton – Modifies and uses RestartButton’s callback function, show GameOverPanel on in game over event using SetActive() method
